

Spring Lake Park Elementary

Blaine, MN

Integrity Built

Loeffler Construction & Consulting provided Wold Architects and Engineers with a Design-Development and Construction Document estimate. The project included a new 2-story elementary school totaling 88,000 square feet. Open collaboration spaces, state of the art classrooms, and sustainable construction, mechanical, and electrical systems were incorporated into the building's unique design.

The new elementary school has two secure entries available for use as well as an adequate amount of space for teachers and students. The learning commons provides students with an interactive walk between the new gymnasium, classrooms, and group learning areas. Along with the interior finishes, the exterior is composed of glazing and veneer brick, creating a pleasing appearance for the surrounding community.

Client - Wold Architects and Engineers

Construction Cost - \$25 Million

Project Size - 88,000 SF

Loeffler Role - Cost Consultant
