

# Cherry View Elementary Additions

Lakeville, MN

*Integrity Built*

The project is the addition of two buildings to the existing elementary school. The two additions total approximately 15,000 SF. Each addition was considered a separate building. The exterior was designed to blend the additions into the existing building to minimize the appearance they were added at a later date. The interiors added classrooms, Kids Zone, special education, student restrooms, faculty restrooms, and conference rooms. The interior finishes were updated to the District's new standard.

**Client** - ISD 194
