

Humphrey Center - School of Public Affairs

Minneapolis, MN

Integrity Built

This project included remodeling of three tiered classroom spaces in the Humphrey Center at the University of Minnesota. The goals of the project included removal of tiered flooring to improve accessibility, and also to improve classroom standards of lighting and audio-visual aids.

The scope of the work focused on updating the furniture, improving lighting and providing all new interior finishes. The project also included new acoustical treatments as well as audio visual equipment to support telecommunicating for distance learners with web camera and microphone equipment.

Client - University of Minnesota

Architect - The Collaborative Design Group

Construction Cost - \$130,000

Project Size - 2,000 SF

Loeffler Role - Performed General Construction
