

Walter Library Data Center

Minneapolis, MN

Integrity Built

Walter Library is home to the newest server bank at the University of Minnesota. The Minnesota Super Computing Institute (MSI) purchased a new HP computer called Mesabi, which provides 674 Tflop/s of peak performance and 67 TB of RAM to faculty and researchers at the university.

Loeffler Construction was awarded the project to replace old equipment and upgrade the electrical and cooling systems to allow for a seamless transition to the new supercomputer. Loeffler was also responsible for coordinating and completing final connections to the new HP computer equipment.

Client - University of Minnesota

Architect - Dunham

Construction Cost - \$239,000

Project Size - 3,700 SF

Loeffler Role - Performed General Construction
