

Upper Blue Elementary School

Breckenridge, CO

Integrity Built

Loeffler provided Wold Architects and Engineers with architectural and structural cost consulting services for Upper Blue Elementary School. This project consisted of renovations to the existing facility and student spaces to help create more “makerspace”, and to provide new mechanical systems.

The cafeteria / community room was a new addition that was built into a pocket of the existing structure. This addition altered the exterior pathway for student drop-off, which further required exterior improvements to ensure safety and ADA requirements were met for all students, faculty, and visitors.

Architect - Wold Architects and Engineers

Construction Cost - \$4,018,782

Project Size - 48,785 SF

Loeffler Role - Cost Consultant
