

UMN Public Safety Facility

Minneapolis, MN

PATROL ROLL CALL & WORK STATIONS

FRONT LOBBY

Integrity Built

Loeffler provided Construction Manager at Risk services for the Expansion and Renovation of the University of Minnesota's Transportation and Public Safety Building on Washington Avenue. The project consolidated under one roof all public safety divisions on the Minneapolis campus, including the Police Department, University Security, and the Public Safety Emergency Communications Center (PSECC).

Since the existing building was fully occupied, the project required a phased approach to displacement and construction which included relocating occupants of the Center for Transportation Studies (CTS) and PSECC to make room for the expanded police facility. Critical to the University, the UMPD and PSECC were fully operational and continued to operate with no "down" times through design, construction, and relocation.
