

Eastview Elementary School Addition

Lakeville, MN

Integrity Built

This project includes a two-story, 9,000 SF addition to the south-east corner of the existing elementary school. The Lakeville Area School District faces an increasing student enrollment over the next five years, and to accommodate for this growth, will add four classrooms and four breakout spaces.

Due to the geographic location of this school, building code requires all newly constructed school facilities to include a ICC 500 Storm Shelter. This requirement was taken into consideration during the design phase. The lower level classrooms and breakout spaces function as the Storm Shelter and require strengthened foundation, walls, roof, and openings.

Client - ISD 194

Architect - DLR Group

Construction Cost - \$3.1 Million

Project Size - 9,000 SF

Loeffler Role - Construction Manager Advisor
